Welcome to the second episode of our new Blueprint show. A show that highlights what we at THI are doing in our endeavors to change the world, one person at a time. Our main show Truth, Honor & Integrity ran every other Thursday, highlights what the world and the system is doing to us, this show is about what we are doing.

We are attracting many people to our group now, from many diverse backgrounds and here is an example of it. This is all about becoming part of the lotus of life and all combining together to create a better world. So I am pleased to be able to read this out on behalf of one of our members. My community Profile and Introduction: Fundong is a rural community in the Cameroon and it's the headquarters of the Boyo Division of the North-West region with over 5000 inhabitants. Due to very low level of employment in the country, this population depends solely on subsistence agriculture. This culture has been ongoing for many generations until 2016 when a socio-political crisis started in the country, which resulted in massive killings, destruction of property and displacement of the population and families. The population now lives in abject poverty because of the inability to carry on with their usual daily routine, given that ghost towns have been imposed on certain days of the week and majority of the youthful population which constituted over 60% of the population have been displaced for safety. Ghost towns are where the residents close all shops and desert the streets and work together to bring community spirit, in spite of threats made by the authorities. If only people in New York and or California do that. Youth actions: In order to solve this problem, we (the young people) under the banner of Sustainable Action for the Emancipation of Vulnerable People which is a youth led initiative, try to identify problems ranging from health, education, unemployment and sustainability. Then find possible solutions and make an appeal to both the local authorities the quarter heads or Chiefs and administrative authorities for assistance. They then mobilize all their subjects for sensitizations, empowerment and rehabilitation, workshops and capacity seminar. Outcome: After every workshop or capacity building program, every participant organizes a PIO (Pass it on) in their various localities to continue to administer the knowledge and skills learnt to other young people. Over 500 hundred young people have been trained in the areas of leadership and local governance and are now aware and can defend their human rights. We've provided palliative care and are still doing so for very vulnerable households. Empowering young girls, promotion of gender equality and education on

gender based violence. Future project: Construction of a rehabilitation center where young people can be empowered through vocational training programs and also where human rights will be taught. Fantastic stuff to see and hear, notice it is the youth teaching the adults again of how to be, do and act. We will see a lot more of that in the future. Interesting term they use of pass it on, that is their version of pay it forward.

BLUEPRINT ACTION GROUP REPORT: 2023-7-13 BOOKS TEAM: The Divine Masculine and Feminine booklet has been reviewed and updated with corrections and improvements. In the coming week, it will be presented on the website as a free download. The Bulgarian translation of FHSTOS Volume 1 is in final proofread after formatting by the translator. The German book translation is ongoing, as are the Hebrew and Romanian and German Blueprint translations. The French Blueprint has been uploaded to storage and is available to be put on the website when the translation section is prepared. One proofreader has forwarded the Spanish translation of the first section of the Blueprint and that has been sent on to the translator. Comments or corrections by the second proofreader will be sent once that has been received. **RESEARCH TEAM:** The Research Team has completed reviewing the last 14 months of shows for the names of Influencers mentioned in them. Over 500 names are now in the database with at least one form of contact information for all that have an online presence. We will now be formulating the database for ease of searching and preparing reports by category of country, state, region, territorial province, and by the different social media platforms. We will be posting a form on MeWe for members to use when sending the Research Team information. We are now finding missing information such as mailing addresses and phone numbers for future hand-delivery purposes and building a media contact section. THI members have sent additional name suggestions from their countries: Bulgaria, the Canadian Provinces, France, and Australia. We have now also checked Linked-In for contact information and Twitter. Dedicated Research Team Email (MamaZ/Debbi): All emails to MamaZ regarding the Blueprint should be sent here: BPResearchTeam@mail.com. Alaska Influencers (Colleen): It took four calls to get a personal call with Senator Shelley Hughes. Colleen said she would like to hand deliver a Blueprint to the Senator. The Senator said she had two books she was reading now, but Colleen could drop off the Blueprint. Colleen explained she would like to introduce a woman who was trafficked, but the Senator said that wasn't her area and passed Colleen off to another Senator. Colleen felt arrogance and lack of empathy from the Senator that was discouraging.

International Influencers (Brigid): Brigid has submitted influencers from her area.

Initial Contacts: Thomas is mailing hardcopy to Elon Musk, Douglas Rushkoff, Benjamin Fulford, & Candace Owens. The Research Spreadsheet was sent to Roger and Thomas last night to review. They will set influencer priorities. I can confirm the 3 books have been posted out. I messaged Benjamin Fulford on Skype and he received the message I can confirm, but hasn't responded as yet since last Friday. I suspect the 3 books will be arriving at their destinations by the end of this week and we will see if we get some feedback from it. I have 10 books on order for next delivery stage

MEDIA TEAM: The media team have opened the Tik Tok channel and are currently putting out some content to gauge what will work best on this platform. We hope to engage a younger audience from this platform and will work with the Youth Team to achieve this. So far, we put out 5 videos and each are having on average over 200 views a day. The You tube account is also garnering 3 to 400 views on each video posted so far. We hope to do better with this reach and will continue to assess it as we go. Twitter THI account has 338 followers is doing well, we are putting out bolder content and adding links to the shows to back up the statements. As most channels that put out content do not have the library of information that THI has amassed to back up their statements. Twitter BP has 630 followers and has had a lot more engagement mainly because of the members retweeting and commenting on the tweets, this will help us gain traction and reach a wider audience. We thank those that have worked hard to help us by sharing tweets, commenting on the threads, or simply liking the tweets. The Blue Tick may also be contributing to this as it helps our channel to be seen over others. The aim of all these platforms is to funnel back to the mewe page and engage more people that may want to become involved with working on the blueprint. And while views play a role in having to play in their world, a wise tiny man gave some rather interesting and thought-provoking message recently. What if we are just the seed planters that are in overview setting a frequency around the blueprint that in turn blossoms. This gave me a chance to step back and realize that playing in their world puts us back into the hooks and loops system that was made to put us in the external rather than the internal. The internal holds all that lies within that is now emerging into the flower of life we all are capable of being. Seeds need the right environment to grow, but mostly they need love and care. Within THI there are many seed planters, that have taken their power back and are willing to be the face of THI, they have had the courage to reopen their dormant twitter accounts or Telegram accounts and share those seeds daily, weekly, or just internally holding space for what is to come. It can take courage to walk again in the world that we are fighting on many levels to take back. Truth is a frequency it will go where it is needed, with its own internal rudder and take seed where the right environment is already waiting. All we need to do is show up and be the creation of the frequency and share it with the full knowledge that in no time, we are the change, we are the truth, honor and walk with integrity into a brand-new creation that is unstoppable. Thank you to those seed planters, the ones that are willing to not only say they want change but are already emerging as the change we all so desperately desire.

NEWCOMERS ZOOM: Newcomers Group: Purpose:

To meet with and help new THI members feel welcome, answer their questions, and introduce them to the THI & Communal Gathering resources.

Create the foundations of trust and build new relationships.

Help understand what skills & passions new people have and help them get more engaged in support of the new blueprint.

Current THI Newcomers Group Members: Roger Isaacs, Susan McCann, Michael Blaha, Steve Wilkinson
We are putting out the call for new members to contact one of the above if interested in joining a Welcome to THI Zoom. Initially we will schedule a Zoom meeting to cover EU/US and Aussie time zones. Assuming the group grows, we can be more flexible and adapt Zoom schedules to better match regional time zones. We are also looking for seasoned THI-urs to join the team and help us. With more help from longer term members, we can offer more Zoom flexibility and options for newer members to meet and greet. Also, we are thinking this could set the foundation for how we organize as we get contact and potential volunteers from the Blueprint outreach by yourself and the Media Team. We may need to start thinking about how we will organize and structure ourselves so we can direct people to the Solutions they are passionate about and create groups to engage and start to collaborate on how to evolve and implement each solution... Mike also noted that there will a small initial Zoom meeting for newcomers this past week.

YOUTH WEBSITE: The Youth group is really beginning to come together and sharing ideas that will eventually become a website oriented towards the youth. The name chosen for the youth group is YouTHink Different. The first biggest venture is the creation of the website and there is now a basic template that the web team will take to start on. We would like it to be interactive for the younger members, so they are free to add their ideas and needs for their future, and with a wide library to choose from within THI there is no shortage of material to pick from and adapt for their interests. The solutions will be a part of the website and we are currently looking at ways that help them to interact with the solutions they feel drawn to and even come up with their own solutions. The idea is to help them feel heard, seen and listened to. Topics such as the consent booklet and the Divine feminine and Masculine Booklet and even Law topics will all be included in the overall site. We also welcome any members that want to help with ideas or building a website. Please contact any member of the Blueprint group.

WEB TEAM: MamaZ had a recent discussion with Ovidiu and he suggested the Blueprint website would be the best avenue for emailing the Blueprint. Ovidiu stated previously that his team would need 2-3 weeks for emails, but they would try to accommodate special issues. Dave reported on the website. The main advantage of their MailChimp program is that it tracks whether the email was opened and Users must be subscribed. Web Team will do an announcement with first and last name as a test. Title to be included, so profession such as Senator is needed. ThinkDifferent in collaboration with TPC The Peoples Club are pleased to announce the release of our newest booklet: the sacred divine masculine and the sacred divine feminine; you can download the PDF free of charge at <https://thinkdifferent.thepeoplesclub.org/we-are-sacred-and-divine>; if you like our new booklet and would like to make a donation to the TPC you can do so at <https://thepeoplesclub.org/help-us> using the Donate button. This week's news is not technology

related as you might expect, but instead about people; people from different countries all over the world, people of different backgrounds and walks of life, who simply want to be part of something better, something worthwhile supporting. The desire to contribute is palpable and the hands-on results match this desire. On the gardening project we have 4 people actively creating individual posts from the collection of gardening information available; based on the progress made in only 3-4 days we conclude the gardening website will be ready much sooner than originally envisioned. We also have 3 people actively working on the THI shows encyclopedia project which is also progressing nicely. The various pieces of work carried out and not just in the web team, and also people's varied skills all seem to converge together and we can see this experience. The team building and people learning new skills to be foundational for future tasks and projects we will undertake. Getting outside of one's comfort zone to learn something new, perhaps something they never thought of doing, is important for personal and professional growth. This time we provided tutorial videos and in-depth guidance and our various contributors have taken it all in their stride learning every step of the way. We can see ourselves going one better and realizing that next time we can actually teach ourselves and this is a wonderful realization and skill because it doesn't apply just to technology, it applies to all areas of life. The key ingredient in all this is of course us, each and every one of us because each and every contribution makes a difference. Last but not least the web team and the youTHInk team met to discuss the new youth website; immediate tasks and next steps were agreed with another meeting to follow to kick off development of this initiative. If any of the above sounds appealing to you or indeed inspiring, if you'd like to learn new skills or put existing ones to good use, please join us; private message Ovidiu on MeWe or indeed post a comment in the main THI chat on MeWe saying you'd like to contribute and one of our members will see that you are put in touch with the right people. Thank you in advance.

MUSIC/MEMBER CONTENT: This will be an ongoing project, though we currently have a member that is working on creating a reggae song. We also have received several musical compositions now being used in our videos. This is a great asset to the frequency that is representative of the collective consciousness of the group and the blueprint. If anyone has an interest in contributing or creating music or has skills in song writing, or simply has knowledge that can help this group, please contact any member of the BP team.

LAW GROUP UPDATE: The Law Group facilitated a 3 ½ hour Zoom on Wills and Testaments in June. This was a deeper dive into Cestui Que Vie Trusts, Birth Certificates, and the enclosure of Wills & Testaments. Forming the mechanisms that created the legally dead fictional Person and how we are tricked into consenting to their claims of ownership and control of the will (mind) of the person, in order to steal our wealth and subjugate us. On Sunday, August the 6th we will be facilitating our next Zoom, on The Sacraments of Baptism and Penance, what are Courts and how they operate. This is a dive into the occult nature of the private BAR Guild system, how they trick us into consenting to be a thing, a property under the custody of the court. How we are tricked into self-confessing and accepting liability by a private contractor, masquerading as a judge, on the trading floor (court room) of a merchant bank whose purpose

is to make money by commercializing sin (crime) and creating bonds in in order to secure payment of penalties, known as corporate securities. Details for the August sixth zoom are posted on the Main Law Group MeWe page. If you wish to join us, please private message Roger Isaacs to join the Law Group and access the links. The Law Group has made significant contributions to the creation of the Blueprint. Bringing the True Rule of Law to life takes dedication, study, and persistence. As we move forward, we will need to share and teach the principles of the True Rule of Law as the foundation for building communities of trust based on the ideas. New models and systems needed that will benefit all of humanity, and which will replace the old harvesting models and systems, gradually making them irrelevant. Throughout history lasting change has always occurred when the old models become irrelevant, and never through violence or revolution, which is just the new boss, same as the old boss loop. Until the underlying ideas, models and systems change, nothing changes. The True Rule of Law is based on self-responsibility, truth, honor and integrity. We are looking for THI members, new and existing, to join the Law Group, willing to roll up their sleeves to do the work, study the material to the depth required to be the teachers, the way showers, so we can manifest the Blueprint. We are ready to run another Intro Series on the Fundamentals of Law to help people get started. Please reach out to Roger Isaacs via private message or on the Main chat if you want to learn more. As soon we have 5 to 10 people interested, we can go ahead and schedule the zooms. When we study the spiritual texts, the Ucadia Canons and the many other articles we have available, it changes us. Having read the material multiple times over the past 4 years, I can vouch for this. It changes us at a DNA level, activates information we have stored inside what is known as “junk” DNA (it is not junk). Words are vibrations and have power, the material helps us see through the lies and raise our frequency to truth vibrations. If you are passionate about manifesting the True Rule of Law, please join us. Remember, we are the blueprint, we are the Higher Universal men and women. As Guardians of this planet, it is our responsibility to be the living spirit of the Law. The question we must ask is; what do we choose to manifest? We get what we consent to as Free Will is a foundational principle of the Universe. We must have the humility to accept we have been tricked into consenting to their ideas, their insanity. We must transcend the mind virus of ego that was inserted into us (their image), let go of programs such as the lack of self-worth and remember who we are, eternal spirits, each an individual droplet of the Divine Creator, born perfect, inheriting natural rights of use and ownership of our spirit, mind and body, rights of use of this planet and all upon it, and the obligations to care for each other, share our resources equally and ensure there is enough left for future generations. We must walk the walk, intention, willpower and action focused on manifesting our story. This is our time. We have come home.

In two weeks’ time we will be asking two countries to unload the Blueprint within their countries as much as possible. Preferably by email, twitter or some other platform with the pdf link in the post and a link to the new blueprint for humanity. Org website. Following sending links, please notify MamaZ or in the blueprint mewe page of who you have sent it to and also any feedback. BPResearchteam@mail.com They are important for tracking. 6 of the books will be going out soon to Tucker Carlson, Ron DeSantis, Marjorie Greene, Amazing Polly, Robert F Kennedy Jnr and Lauren Boebert. 3 pdf’s will be going out to

Professor Richard Wolf, Crrow777 and Pearl Davis, hoping they will all be accomplished before the next Blueprint show. The more mass sending out of the documents will be forthcoming when the website team are able to sort out the emails coming directly from the website to then link back to us. In relation to Colleen not feeling she was responded to correctly, I wish to make an important point on the approach and thinking behind these engagements. You approach it not with an end goal, but only to plant the seed. It is not up to you or us to grow that seed, that is their role and the collective consciousness will add to it. Everyone wants the external proof it is happening, I get that, but it is the internal effect that is the most powerful. The fact you have planted the seed, is the powerful effect, the rest will eventually take care of itself. As an example of this, our team walks up to the White House door and we hand over the Blueprint to Biden, all of it is video'd and our group rejoices, right? We then get invited in, once in and away from the camera he throws the blueprint into the trash can and says we don't want that. But the viewers of the video only taken outside still rejoice, but the internal effect was not as positive or so people will think. It is all about the purpose and the intent, planting the seeds and eventually we will have planted so many seeds, they will start to grow. The number of references globally of the word Blueprint is proof of internal impact. The proof of the collapse of their world and institutions is also a marker of change becoming inevitable. We are positioning ourselves to be at the forefront of that change. I am getting a sense of URgency about this whole thing ongoing right now and urge authorities to take some time to speak to us. Things are starting to escalate as we will see in next weeks show, all the warnings given some time back are converging now, and it is going to get real ugly. Observe it don't absorb it. Over the next 12-24 months the volume of truth will increase exponentially, it can't and won't be stopped. That will please the alt media as they go high fiving themselves over being right, we at THI must prepare ourselves for increase in traffic and engagements. The problem the authorities face are; 1. They don't have a plan 2. They don't understand life or the system 3. they don't know how to fix it and 4. They don't have a plan. This will lead to carnage on an unprecedented scale, as the people will all find out the "conspiracy theorists" were right all along, and not just about Covid either. Those people will feel stupid, angry, shame and guilt of dismissing loved ones, friends and family members and will want a scapegoat at best, blood at worst. At that point things will get real ugly for the front line people, like the police, politicians and news media. I would not wish to be in their shoes. The Blueprint is designed to alleviate all of that, as each institution collapses, which will never be trusted by the people again or for a long time. Then that is an opportunity to replace them all with something better, for and by the people. A chance to put an end to the greed, crime, corruption, scarcity programs and fraud. A chance to give the people at last something to be not only excited about, but something they wish to be involved in and with. The greatest thing for the people is, it would bring them hope. Hope is the avenue of the light.
