

THI-SHOW TRANSCRIPT 2023-10-26

Recently one of our members was seeking support for our Blueprint had an interesting discussion with a member of the past in THI. Unfortunately for Thomas Melville he is put in between all the rhetoric of a one-sided nature and personal retorts about me. Kim Goguen had this to say and for the point of clarity and balance this is her version of me and subsequently Tom's version as well: I work for the dark forces. I lied about who set up and created THI. The THI shows have been hijacked by me and every single week for the last 3 years I have labeled Kim with several labels including calling her an idiot most weeks. I have an army of rogue Military and Agency based intelligence people around me. I stole from some agency database or I was given Thomas Melville's phone number by the bad guys I work with. I have committees set up with the sole purpose of trashing the Trustee each week. I spend all day sending THI members out onto various social media platforms all to trash Kim. I am a liar and I am controlling all the members. I have blocked members from speaking to Kim. I blocked members sending her flowers at Christmas. I work with George the Viking. I work with her former primary handler. The primary handler and myself are plotting to oust Kim from the Trustee position and install me. That I and we only contacted them as we want money off of them. I stole all the ideas for the Blueprint from her. I could reply but I, as I have done for the last 10 years on my radio show will take the higher ground. You all as listeners I believe for total clarity are entitled to listen to what they have to say about me and THI and make and form your own opinions. I am not here to influence your opinions and we do like to promote airing both sides of the story. So, there you have it. The gist of the call was to ask Thomas Melville to use his extensive contacts to then deliver the BP book, but Kim hijacked the call and fired off the above allegations. And declared she was not interested in humanity, if it is anything to do with Thomas Williams. The call became all about the money and how she believes I am somehow the anti-christ and anti-humanity. I request you all to not retort to those allegations or trash Kim online, as it is being used as a stick to beat us with. Another case of observe, don't absorb.

BLUEPRINT ACTION GROUP REPORT Date: 19th of October 2023. We had an important addition to our meeting. The intention was set before we got into the meeting to be present in the heart space and to operate with cohesiveness to enable good communication and flow.

BOOK TEAM: The Blueprint: Bulgarian main text, cover text and disclaimer are completed and to be formatted. Dutch main text is in progress.

The Blueprint email letter template: Bulgarian is being translated. Hebrew is being corrected due to an issue with transfer of documents.

Volume 1 of From His Story to Our Story: German translator is waiting for proofreading corrections and working on the best way to translate the title into German, as it does not translate well from the English. The group discussed the need to translate the feeling, the image, the frequency of the true message and

exchanged suggestions for the German translation. Two translators are working on the Swedish translation of the Blueprint.

Volume 2 of From His Story to Our Story: The team has decided the Consent and Divine Masculine and Feminine booklets take precedence and will work on those before beginning Volume 2.

Consent Booklet: The German translation is done and has passed to the proofreading stage. The Bulgarian translator is starting the Consent Booklet.

The Divine Masculine and Divine Feminine Booklet: The German translator is starting work on this.

True Rule of Law video: The German translator has volunteered to work on this as well. One translator has spoken to key local influencers. At an event, she left a copy of From His Story To Our Story with an interested party, that copy to be lent to others. She also gave links to the website. Another book was passed on, as well. One of the influencers intends to send the website link to contacts in Turkey. Another influencer already had a copy and spoke of it with colleagues; he has invited the translator to speak to a group about it.

RESEARCH TEAM: The Blueprint Research team is delighted to report that the database has blossomed from form to function. We can now generate customized reports. The THI Admin Team Lead received the first three reports, which were: Sixty influencers for whom we have postal mailing addresses to send books to. Sixty-three influencers for whom we have email addresses to send book PDF'S to, and Sixty-five influencers for whom we only have their social media site 'handles' on Twitter, LinkedIn or Telegram. This specific list was also sent to the Media Team. They kindly offered to lend a hand in coordinating outreach in those arenas. That is a total of 188 different names to be scrutinized as to strategic approach method. On October 17th, the Web Team likewise kindly assisted, by helping us email 17 influencers from the website. We were able to utilize the official email letter, which had been translated into French by the Book Team French member. The English email subject line is, You are the Blueprint – yes you! with the influencer's title and name. The French member translated it for us and even gave us some instruction on how to properly address male or females. That helped us accomplish a secondary mission of sending the Blueprint book PDF to other countries. We got the ball rolling with France and England. The French influencers to be the first receiving the French translation were: Valerie Bugault of the Revoludroit. Liliane Held-Khawam of re-organization du Monde, an Economist and whistle blower. Michel Jean-Dominique - an Anthropologist, health specialist and whistle blower. Alexis Cossette of Radio Quebec. Freddie Ponton of LFC News Media. Henry Makow, author of the book Illuminati, the Cult that Hijacked the World. The United Kingdom influencers receiving our PDF emails were: Laura Aboli, Founder of United Democratic International movement for awareness and freedom (UDIMAF). Sonia Poulton, - Journalist and Broadcaster. Robin Monotti Graziadei – an Italian architect, film producer and bio-urbanist based in London. Owen Benjamin of Unbearables Media. Mark Devlin – a UK based radio DJ, journalist and

author, who speaks out against the dark forces that have been manipulating the music industry for decades. Charlie Robinson, author of *The Octopus of Global Control*. Joanna Cherry, Member of UK Parliament who is a Scottish politician and lawyer. Ash Meikie, now based in Asia, but still the Content Director for Shaun Attwood who is a former stock-market millionaire and Ecstasy trafficker turned YouTuber, public speaker, author and activist. Shaun is banned from America for life. Email #17 went to Michael Telling, co-founder of One Small Town.org, Ubuntu Planet (based in South Africa), and the Ubuntu Liberation Movement. They help build cooperative villages around the world and the Blueprint, would be a fine addition to help the villagers form their local councils with solutions for fresh start change. As a reminder to all members, the final approved BP email template letter is posted to MeWe in the files section of the Blueprint Group. Please go to the website 'Saying Hi' contact form to let the research team know who you sent it to and any contact information you have for them. In the subject line, you will be able to click on a drop-down list. On that list, we are Blueprint Feedback. You may use this method of reporting any feedback you get, whether positive or negative. Also, it can be used for making suggestions of influencers to add to our database. As was mentioned in the last report and suggested again in the MeWe chat thread recently, next month the Research Team will expand the database. We will focus on gathering contact information for all US news media outlets for now and all U.S. Congress members. We also plan to add the Canadian House of Commons MP's (Members of Parliament) and Senators from each Province.

MEDIA TEAM: We have begun the task of taking names from the spreadsheet with the purpose of contacting these influencers on Twitter and Instagram. We decided to begin with the first 20 on that list. We needed to find out firstly what platforms they are on, either Instagram or Twitter and then we need to begin to follow them if we haven't already. While we do have some twitter handles there are many blanks on the sheet. We will begin to recover the handles that are missing on the suggested names. We also began the task of correlating the best way to interact with them, either by commenting on their posts and or sending the pdf. Commenting gets attention from their followers and is a worthwhile interaction. As the audience is more important in many cases than the influencer. If our comments do get attention, then this will alert the influencer also to take notice of us. The true aim would be to get them to follow us. How can you help us with this: Simply go to our Twitter or Instagram account and look at the people we are following. Pick one of those to follow also then simply comment on their posts regularly referencing The New Blueprint for humanity in your comment. If ten people did this every day, the term The New Blueprint for humanity will be get out into the public arena a lot faster. Here is also an example of what hashtags do on social media platforms.

Hashtag Use on Instagram Brief Description: A hashtag is a metadata tag that is prefaced by the hash symbol, # Other descriptions are: tagging, uri fragment, folksonomy to mention a few. Companies, businesses and advocacy organizations, have taken advantage of hashtag-based discussions for promotion of their products, services and or campaigns. Another function of the hashtag can be used to express personal feelings and emotions.

Why we use it presently: Hashtags are particularly useful in unmoderated forums that lack a formal ontological organization. Hashtags help users find content as well as similar interest. Hashtags are neither registered nor controlled by any one user or group of users. They do not contain any set definitions, meaning that a single hashtag can be used for any number of purposes. In our push to inseminate the frequency of our Blueprint, on Instagram, as well as other social media platforms. We have adopted the use of hashtags, in order to allow our message to reach further afield, than otherwise possible. To give our listeners a better idea, and visual example, if we post a meme referring to an earlier excerpt in the THI-Show. Let's say using the words, saving the environment.

The first step to save the environment: Stop believing government that the government knows what to do.

The second step to save the environment: Start listening to those who do.

The third step to save the environment: Join us in implementing solutions. Be the change. The New Blueprint For Humanity. So, one post on the subject of the environment by the use of hashtags, we take advantage of further extensions of our own subject matter. Which then appears in our page and every hashtag page that we use for this post. In this case we effectively capture space on sections of the platform, by use of hashtags, which were used as follows: #blueprint for humanity 111 #step(s) 2.3 million posts #know what to do 7.400 posts #be the change 7.8 million posts #save the environment 274,000 posts #save the planet - 6.8 million posts #listen to this - 4.4 million posts #implementing – 11,000 posts Essentially, an eye-catching meme and or impactful words, can insight a trend for the onlookers. All of this is steered thankfully to AI algorithms, that follow trends and words. To fulfill their agendas and shekel making programs, randomly and without prejudice. Changing the narrative comes in many formats and we are learning as a team that influencing people to change, of how they think and act is multifaceted. We are also exploring avenues on merchandising and will update more on this as we make decisions and progress. This is an exciting new project to undertake and like all our projects we need people to come forward with their ideas and help in any way they can to be part of the team.

YOUTH WEBSITE: The Youth Team met on October 14 and had a lively discussion. A number of topics were discussed, and decisions made.

Youth Target Age: We are targeting the College/University to late 20's age groups. We feel this demographic tends to be altruistic, energized and want to change the world. By engaging them on issues they feel are important, we can create a dialogue based on the things that have the biggest impact on their life and what they are most passionate about. We can encourage them to question the narratives they have been given and guide them to the information that will help them think and act different. Younger children tend to follow older teens, so by engaging the 18 to 20 somethings, we can encourage and influence younger generations through youth leadership.

Website Progress and Content: There was a great meeting with the Web Team regarding website development, with a tour around a potential youTHInk mock website and what can be done. The site will be built around ten content areas. It will be on the THI server but will be a separate site. The users will shape the website. Interested users might even write a youth-focused summary of Solutions with an editor to ensure that the Solution intent isn't lost. The team will provide the initial content to attract youth to the website. Solutions may be used for reference, but the content needs a youth focus. The team decided to target the first five areas listed below, engaging youth with questions related to their issues. The website will be refined by the users' feedback and participation. An additional five content areas were also suggested to complete the 10 content areas required to develop the website. Topics selected were from conversations many of us have had with youth and these topics seem to be of concern or interest.

The content areas suggested are: Food, permaculture and gardening. Law and consent. Housing and job security. Gender issues and integrating the Divine feminine and masculine. Climate change.

Additional content to encourage engagement: A blog to ask relevant questions and give youth a voice. Photos and videos that link to THI media memes. FAQs to emerge from user discussions. Memes and some humor in life's craziness.

Topics of interest: The idea is to provide a simple view, with photos, music, memes to capture the imagination, then a one clicks to some questions, mind teasers to encourage thought and the desire to explore more. With links to detailed Solutions for deeper study and the ability to connect with youth around the world with common interests and concerns. The youTHInk Team will continue to meet bi-weekly, with some discussion ongoing about a more convenient time for all. No decision has been made yet, but we have to cover time zones from Australia to N. America, Africa, and the EU, so can be challenging. We invite any THI members passionate about engaging Youth, especially our younger members, to join the youTHInk Team and help us create a youth centric platform that will engage younger generations and help them get involved in bringing the Blueprint to life. Please reach out Katie Nichols on MeWe if you would like to join the fun!!

LAW GROUP: We are currently planning the next phase of Study Groups and are proposing the following approach: 1. Intermediate: i) For those who completed the Intro Series in 2022/23 ii) Purpose: To encourage deeper self-study. To use the knowledge to connect the dots, understand how the fundamentals relate and operate in real life. To read, reflect, tap into inner knowing and make knowledge of law part of who we are. iii) Focus on Parts 1 thru 7 (these are the building blocks) iv) This will be a "teach back" process. We encourage all to study the material (all in the Ucadia University Files on MeWe), select a topic or 2 and plan to share your understanding with the group. We suggest spending about 10 minutes on your topic, what you understand, your perspective and questions. v) We can then debate each topic as a group to build a clear picture of the subject matter

2. Beginner Level for New Members to the Law Group: i) This will be a repeat of the Intro Series for newcomers and existing members who want a review. ii) To kick off this series, we will prepare some overview slides that will show topics to be covered, intro basic concepts and why they are important. iii) We prefer not to record these. Learning is deeper when interactive, watching videos can be less effective, leading to a lazy approach as in I've seen the video, that's good enough. As our understanding evolves, older videos may contain some errors. We also found it is in the conversation, the interaction, that deeper learning occurs. Lastly, we have built and continue to build positive relationships with our THI peers through the live study process. iv) Reminder that the Intro series is an introduction to basic concepts that underpin Law, it's the operating system. This series does not convey enough depth to succeed. Deeper study of all Ucadia material is required for that. The fundamentals will help people better understand the Canons and fundamentals of Law.

Studying the true Rule of Law and gaining a deeper understanding of the true provenance of Law, provides us with foundational competencies that help us develop ourselves as Guardians of this planet. This study also helps connect us with RITA (Divine/Cosmic) Law and bring to life the attributes and qualities of character we must develop within, in order to be the living spirit of RITA Law. Studying Ucadia, the Santes of Perun and Vedas provide a holistic view of who we are, where we have come from and how we can operate as higher universal men and women, to bring about a more balanced and equitable society. We will announce Zoom schedules when ready. We encourage THI members to join the Law Group Communal Gathering and Universal Law MeWe group if you want to attend these sessions. Please PM Michael Blaha or Roger Isaacs if you have questions.

EUROPEAN GROUP: The European group meets every Monday evening at 7pm GMT. They had a discussion regarding beginning to look at changing the Blueprint Solutions that were geared towards the US and adapting them for the European countries. There are about ten solutions that need to be amended. They include the following: The Government Solution The American Overhaul Solution The I.T Solution The Military and Défense Industrial Solution The Soldier Return Solution The Banking and Financial Systems Solution The Tax Solution The Health Care and Health Cost Solution The Disaster Relief Solution The Covid Solution If you have any interest in joining in with this project, please contact anyone from the Euro group. There is also an opportunity for anyone to translate the Blueprint Book and PDF to their own language, if you feel you could take on this task, please also get in touch with us. There is also the option of two or three from the same country taking the book or pdf and coming together to break it into parts to translate.

Web team update October 19th The blueprint website has had 2 new PDF translations for Hebrew and Romanian; these can be found on the homepage at thenewblueprintforhumanity.org in their own section, about halfway down the main page. With more translations from our members and contributors available in the future, we envisage creating a dedicated web page plotting all the countries in the world and the blueprint PDF translated in every language. If you can help with this monumental and momentous task,

please get in touch; your help and contribution will be most valuable and also greatly appreciated. Work continues at pace on the new THI encyclopedia, the improved archive website allowing those interested to listen to the shows and read the transcripts at the same time; progress is steady thanks to our dedicated contributors. For those interested, all THI links can be found at https://linktr.ee/thi_show_com.

The web team took part in sending out the Blueprint PDF emails sent out recently to: Laura Aboli, Sonia Poulton, Robin Monotti, Owen Benjamin, Mark Devlin, Charlie Robinson, Michael Tellingier Joanna Cherry, Valerie Bugault, Liliane Held-Khawam, Michel Jean Dominique, Alexis Cossette and Henry Makow.

IN OVERVIEW: We had a very lively meeting with much to discuss and decisions to ponder on going forward. We have great attendance at these meetings, which adds to the power we are generating now. We begin our meetings by setting the intention and getting into the heart space, which has purpose and aids the flow of the meeting, and indeed how we work together as a whole. Why do we do this, and why is it needed? The etymology of the word intention reads as follows: Intention: from the French word *entencion* late 14th century. purpose, design, aim or object, wish, that which is intended, aspiration, will, thought, to stretch out and extend. The Germanic word for this was *ettle* from the old Norse *aetla* to think, conjecture, purpose, intending, increase a degree of force. We have all learned well in THI the power of words and their spell casting use of these words. But nevertheless, we also have learnt that we have our own power, our own will and our own power of creation. Reclaiming these words for our own purpose infuses a new energetic force into them and reverse any negative connotation that had been present before. One word “Intention” holds all the above, which sets the energetic force before our meeting begins. Pausing and taking time to think before we engage brings a better way of communication and forms a unity within the group. Working from the heart holds a higher intention and literally shifts and expands our awareness of who we are, why we are present for the meeting and what is our purpose. This leads us to work from a place of true purpose, to keep the focus on the agenda and to let go of any previous energy we may have been holding, before we joined the zoom. How we are in the world is a choice, what we do and how we do it is a choice. We are learning to make better choices, which benefits us all in the long run. Working with Intention steers us to Think and Act Differently, to hold the values of Truth, Honor, and Integrity. We then become that force, that wave and that action. We are reclaiming all that is ours now, we are taking back what was taken from us and paying it forward for the benefit of the all. Re-writing His Story began with one person, but it takes a Village to change the world.

This is an addition to the Blueprint compiled by the book team. Open letter regarding response of Deep State members to Full Disclaimer for Full Disclosure Solution and Pedophile Solution, sent through Benjamin Fulford. Proof of sincerity is required for consideration of any and all alternative proposals. Immediate and permanent cessation of all forms of harm against children including and not limited to human sacrifice rituals and activities, torture, adrenochrome extraction, rape, sexual exploitation in any form, murder and butchering as food, sterilization, genetic manipulation, gender manipulation in any form

and by any means, harvesting and murder of fetuses and children for any purpose, trafficking, kidnapping, caging, farming human beings as livestock for any purpose, hunting of human children and youths, promotion of racism, promotion of gender confusion, and any and all other anti-human activities and agendas, especially those against children.

Immediate closure of all adrenochrome facilities and dissolution of all organizations performing these atrocities. Immediate cessation of all trafficking operations and activities and dissolution of the organizations performing these atrocities. Immediate cessation of all forced migration programs and activities. Immediate rescue of all trafficked and captive human beings and rehabilitation especially of children. Immediate disclosure on mainstream media of the above anti-human programs and agendas including and not limited to specifying false laws and legal structures and organizations implemented to facilitate Crimes Against Humanity. Implementation of measures for rehabilitation of families as well as children. All closures, rescues, rehabilitation efforts, and other activities to be paid out of the personal and family accounts of bloodline families and Black Sun families.

A little feedback message we received: I love this blueprint, love your dedication and hard work to make these new inroads. May we never stop at improving the life of every living entity.

My input into this is, isn't fantastic to hear how some of the members are developing so much on an individual level and on a wider scale. What you have just heard is a fantastic body of work done on behalf of us all. The question remains: why wouldn't you wish to be a part of those teams and we can expand it even further. Other things going on in the background is the development of new websites for Gardening and Law. They will be a fantastic database for you all in the group and on a wider scale outside of the group. This is the evolution of the Communal Gatherings created in April 2021 and the body of work and learning in both of those has been extraordinary. It has now evolved into eventually their own dedicated websites, that can be expanded even further and draw more people in who wish to be involved. The garden and law group both played heavily into the development of the Blueprint document as well. This has been their evolution and it will evolve further once the websites are rolled out. There has been more ideas for both to further their evolution discussed in a recent meeting, like seeking out other law and gardening groups and introducing them via memes or links. So, if they are your passion or interest, go and get involved. There were other Communal Gatherings that did not evolve like the Garden and Law section, but if you have a passion for one of the Solutions in the Blueprint and people to support it, we will create more sections as they evolve.

Remember when I said in the first Blueprint airing in October 2022, of how the public would turn on the authorities? Well it is unfolding. There was a death threat to one in the last show, now it has increased. Rishi Sunak the British leader is beefing up security in his country mansion after eco-activists invaded the property. Biden and Pelosi have done likewise. The Prime Minister has submitted plans to build a 165ft fence to cut off a previously open border. The wooden fence is aimed to deter intruders at the £2 million

North Yorkshire home, according to documents. Then we come to America. Death threats, intimidation and family members called out by strangers. A number of House Republicans who refuse to support right-wing Rep. Jim Jordan for House speaker are suddenly learning the true language of Donald Trump's MAGA movement, a movement they have either tolerated or nurtured for years. While MAGA fury is usually directed at liberals, this time it's hitting them like unfriendly fire. Rep. Nick LaLota of New York, after voting against Jordan, said he received an email that read: "Go f--- yourself and die. If I see your face, I will whip all the hair out of your f---ing head you f---ing scumbag. Rep. Drew Ferguson of Georgia said in a statement that after voting against Jordan, his family started receiving death threats: That is simply unacceptable, unforgivable and will never be tolerated. Axios reported that Ferguson told other House Republicans in a Thursday meeting, that he's had to have a sheriff stationed at his daughter's school over death threats from the far right, also one at his house. The New York Times reported that the wife of Rep. Don Bacon of Nebraska, has begun sleeping with a loaded gun after receiving increasingly menacing anonymous calls and texts. Rep. Ken Buck of Colorado said Thursday: I've had four death threats. I've been evicted from my office in Colorado because the landlord is mad with my voting record on the speaker issue, and everybody in the conference is getting this. Family members have been approached and threatened. First off, I will repeat what I have always stated on the show, no violence or threats of violence, that cannot be tolerated in a civilized society. But the Blueprint warned of the backlash twelve months ago and their people in general ignored it, FSS come and speak to us and let's formulate a plan. We know you have no plan and you all don't have security either. It is going to get worse, unless we offer the people hope. Hope comes in the form of the Blueprint, a tabula rasa and a fresh start for us all. Currently they are all blaming Trump for it, no, get it through your thick heads, it was all of you all along lying to the American public, including Trump. And the people are seeing through the illusion of it all and have had enough. Politicians were mentioned, the police, the medical industry are all going to face the public's wrath, unless actions are taken to correct things and the truth has to prevail.

In one of the videos I saw recently, it showed many American Vets in the video speaking out about the lies of the Iraq and Afghanistan wars. Apparently there is 40K backing that stance and in the video they were all throwing away their medals. Is that another example of the internal effect of the Blueprint, as the Military Solution did mention about the folly of awarding medals for killing people was wrong. Either way fantastic stuff by those veterans, the tide is turning on many levels now.

WHAT IS HUMAN? Part 2 Further examples of anti-humanity will be delivered in this piece, let's start off with the millions poured into the UN and charities globally. In 2017 it was estimated that \$402B was given to charity for various causes, from children to care, health, malnutrition, animal welfare etc and yet not one statistic, has shown any improvement in those fields, not one. We had Live Aid and vast billions were given to Africa, did it improve one iota? are they all fed? no, just another slush fund for greedy self-serving people is what it is. Many charity CEO's on \$400K plus per year, those people are not interested in charity, only serving themselves, \$400K a year for charity work? Does that make any sense? I am not expecting for people to be like me and not earn a penny from our own charity the Peoples Club, but \$400K a year is

greed and unnecessary. Nobody needs to earn \$400K a year, nobody, that is pure greed and stealing from the pie and it ensures thousands of others go without or little. As an example my salary for The Peoples club was set at \$50K a year, if or when the Trust funds came out, like I said need not greed. My salary for working with the Trust was set by Kim at \$50K per year, personally I never asked for anything to work for the Trust as I am not interested in the money. But still the Trustee owes me \$212,500 to date and I have not seen a penny to date. Although she did say recently nobody should have to work for no money, well I did and have Kim. So, we ask the question again what is human? is this section a fair example of being human? many will dismiss it, a common theme, many will react badly to it, again a common theme, and the few will look at themselves and go, you know what, all of that is the truth, we have failed each other badly. In the old system way, the people had one role in a recurring plot put forward by the policy makers, they repeated it over and over again, and like bots we copied and repeated it over and over again. By being lazy minded and lacking critical thinking, that one role was in reaction, the order had a new solution, so they then created the problem to push forward their solution, we the people provided the reaction, time and time again. They wanted war in the middle east, they fed the western world a story, people reacted to it and off to war we went. To those that disagreed with it the time, this next line does not apply to you, those that went along with it, believing fake news, you are partially responsible for the deaths of 1.8M Iraqis alone, along with 6500 Americans. That's not fair people will cry, it was the politicians, but YOU voted for them, you left them to make decisions for you, you are just as responsible for the actions of your country, as anybody else, that is what being Sovereign is all about. It is all about not understanding the flow of how things develop and then how things unfold, plus our roles within it. Too often we have pointed fingers away and blamed somebody else, guess what? That never worked, ever. Going forward we must all see the problems, generate the right reaction of a goal to fix it, then come up with the solutions to solve the problem. All people, not just politicians, they are the equivalent of the gladiator arenas in Rome, we are the spectators and you throw people into the lions to get savaged. Sitting there cheering as they get ripped to shreds, not realizing the reason those people are getting shredded, is because the people in the gallery seats don't take responsibility, it's always someone else's problem, that problem is YOU. Millionaires and Billionaires is that being human? Vulture capitalism is that being human? Child traffickers is that being human? Militaries awarding badges for killing people, is that being human? Spending more on military and weapons, than food or health, is that being human? Religious people confessing to be all holy and god loving and yet rape their communities, trafficking children, mentally physically and sexual abusing them, is that being human? creating wars of my god better than your god, is that being human? Many will blame the ancestors and there is some justification in that narrative, but we, the last 2 generations, have all been in the timeline of the greatest jump in knowledge. This current civilization has seen, via the internet, and what has changed from a collective standpoint? Ignorance back then was easily controlled and passed onto the masses. Ignorance now is a choice, that all of you bear responsibility for, are you part of the problem or part of the solution? Will you ask or demand change or will you be the change? Will you be mired in fear and victimhood programs or take responsibility and shine like a beacon?

So, what is human? our record outlined is a not too pretty picture is it? In the fake book written by controlling el-ite men, not god or source, it states let us create man in our image, now I have gone on record to state that book was written about the Anunnaki groups and their offspring, they all carried the mark of the Nephilim. From Melchizedek, to Genghis Khan(cohen), to the Indian gods to Noah, as did Noah's offspring Shem and Ham, all it was said, they had a coat of armor when born, described as scaly skin and no it wasn't eczema or psoriasis, it was reptile skin. Many have interpreted the term let us create man in our image, too few ask who is us and what is our? I thought it was said god made us, is there more than one? Many took that statement as a sign that they made man literally, they didn't. The gods, fake ones, set about turning man into their image via mind control and low vibrational frequency traits, divide and conquer and hierarchy all came from them. Now they are gone and can no longer interfere on the levels previously, yet there will always be some who wish to continue that program, we have enough humans who are as psychotic as their leaders where, what are we going to do to create man in a new image and light? Whilst they created the image, like bots we followed it, when a little circumspect reflection, of yourself and the world around you, could have easily changed this abomination a long time ago. You can't create solutions by looking at only half of the problem, that is why this world is a mess, too few see the bigger picture, too few realize there is a bigger picture, never mind see it, too few critical think or analyze and the ones that do analyze, largely do so for negative purposes. Too many are reminiscent of the children in kindergarten class, listening to the teacher read a book to them, or worse George Bush Jnr, all just swallowed it up and regurgitated it ad nauseum. Only the few asked the questions of its validity or whether it was true or not? Adults are no different to those children, the children had an excuse they were learning the world and were relatively new to it, adults don't have that excuse, you chose to be a bot, listen and repeat, that is not being human, that is a machine. Do we want a world that throws shit everywhere and creates a massive stink? or do we take responsibility for ourselves and create a much cleaner world, where the stink is in the minority, and not the majority? There are no more excuses, you are on your own to create and be creative, be free or stay in your own enslavement? Are you mind or heart based? real or fake? it's all out in the open now and the frequencies are telling the real truth, not the lies you spew out or have been fed and absorbed as fact. Disclosure people cry, you have already had it, that is why you know of it, question is now, what next? Do we carry on not caring, carry on not sharing, carry on in their image or create our own image? That image we create needs to be an almost 180 turn on what went on before, that failed, we failed, now is the time for a new way. A different image, a progressive change and a drive to take this world of children into a progressive, flourishing adult based species. The whispers in your ears are getting stronger as the reconnection to the higher self-bonds closer and closer, but will you listen? So are you waiting for the event? or have you realized yet, you are the event? We end the show with the question we started with, what is human? now with a blank slate, it and we becomes what you make it. Choose wisely and fss learn to be nice to the all.
